PSFD PROVIDES SANDBAGS FOR HOMEOWNERS

Palm Springs, CA — To help City of Palm Springs residents prepare for storm-related weather, the Palm Springs Fire Department provides free, ready-to-fill sandbags at all **five** fire stations. A self-service sand filling station is available for residents at Palm Springs City Hall.

Sandbag Pickup Locations

Empty sandbags are available for pickup at the following fire stations. Residents may receive a maximum of **10** sandbags per household.

- **Fire Station 1:** 277 N. Indian Canyon Drive
- **Fire Station 2:** 300 N. El Cielo Road
- **Fire Station 3:** 590 E. Racquet Club Road
- **Fire Station 4:** 1300 La Verne Way
- **Fire Station 5:** 5800 E. Bolero Road

Self-Serve Sand Filling Station

Palm Springs City Hall
3200 E. Tahquitz Canyon Way

Sandbag Safety & Use

Properly filled and placed sandbags are most effective when used to redirect stormwater away from homes, garages, and other structures. Sandbags are intended to divert moving water, not create a watertight barrier.

Residents should use caution when filling and placing sandbags, as the process can be physically demanding. Residents with larger or specialized flood protection needs should consider consulting a licensed contractor.

Preparing for Rainfall

Residents are encouraged to prepare ahead of rainfall by clearing debris from gutters and drains, securing outdoor items, and using sandbags where appropriate to help reduce the potential for localized flooding.

For additional storm preparedness information, visit the [City's website](#).
